Hi Eleanor,

We have scheduled with our subcontractor to do the Fair Oaks testing on Saturday, May 10th, and the Atwood testing on Friday, May 16th and Saturday, May 17th. The only reason those dates would change is if we need to delay due to major changes to the protocol where we may have to do more prep work, but hopefully that will not happen.

Hopefully those dates work for you.

Thank you,
Alina

Hi Eleanor,

I'm filing our correspondence regarding this stack test and see that the letters we have been sent from EPA are addressed to Robert Johnston. He is no longer our president - our current president is Anthony Koblinski. Would you be able to change the name so future letters are addressed to him? If I should let someone else know instead, just let me know.

We have proposed dates to our subcontractor and are awaiting response about their availability and I will let you know when I hear back.

Thank you,

Alina

Hi Eleanor,

I'm hoping we can get that worked out by next week. It will either be a Friday, Saturday, Sunday or two weekends. We are waiting on costs and weighing options on shutting down production for a day, etc.

I will let you know as soon as we select something.

Thank you, and have a great weekend!

Alina

Hi Alina –

When we last spoke, MKC suggested that a testing date may be scheduled before the protocol is ready for submission to EPA. Has the test date been scheduled?

Thanks,

Eleanor
